

Retail

Custom built pop up shop or full retail facility, ATS translates concepts into reality.

Our designers and engineers are able to draw upon a wealth of experience in the design and manufacture of portable modular buildings. This, together with the utilisation of the very latest in CAD modelling technology and CNC (Computer Numerically Controlled) precision engineering equipment,

enable us to convert your ideas into finished product quickly and economically.

ATS is able to fulfil most clients' exact needs, from a standard mono-pitch lean-to construction to a semi-permanent 3-storey portable entertainment center.

Benefits:

- Made to order, enabling customers to create a structure that is unique to meet their aesthetic and functional requirements
- Use of standard component parts where possible to achieve cost efficiency without compromise on final product finish
- CAD modelling technology
- Rental and purchase options

Applications:

- Retail warehouses
- Showrooms
- Nurseries
- Warehousing
- Temporary car parking
- Popup shops
- Concept stores
- Popup shops
- Rebuild and refurb projects
- Supermarkets
- Seasonal stock overflow
